

INFORMATION WITHOUT LIMITS

We live in a digital, data rich world where we each generate and receive volumes of **BIG data** full of limitless and largely untapped possibilities. We are here to help you identify & create **intelligence** from your data!

Integration

Information

Imagine It. **Delivered.**

Imagine if...

- you could remove the burden of managing your data and information.
- you could leverage your data and information for business intelligence.
- you could share your data and information transactions securely.

i3

Unlock the value of your Data

We help clients manage, comprehend and interpret mountains of data to create intelligence at each stage of the design, build, finance and operate process. We harness the power of data across a digitized asset life cycle.

Transformational Outcomes

We work with you to turn your data from a liability into business intelligence using advanced analytics, virtual design and construction techniques, and custom dashboards. Discover the benefits of systems integration!

Our award-winning i3 specialists deliver real-world expertise

Information

Validated and managed consistently

Intelligence

Created via sensory networks, predictive analytics and real-time reporting

Integration

Delivered across project environments, data sets and workflows

The results are impressive and deliver a competitive advantage

21 Billion
The number of connected devices by 2020
Source: Gartner

Huge Volume of data

Lack of ability to query data and intelligence

Limited Interoperability between systems

Intelligence

AECOM's **data science approach** makes use of advances in information management technology to create a holistic picture of our client's data. Our data-driven insights result in sound decision making while reducing risk and saving time and money.
